AeroTec™ ARS

PATENT NUMBER 6,890,149

More Than Just a Truck Fan – It's an Air Replacement System

Cools Trailer Better, Faster

- AeroTec™ creates a high-velocity column of air that circulates through the entire length of the trailer. Whether your application is cooling/ warming the loading dock trailer or removing stale air from an export crate, AeroTec really moves air.
- AeroTec continually pulls new air in and pushes old air out, unlike ordinary truck fans that only pressurize the air in the trailer, which does not allow for adequate air exchange.

Reduces Maintenance Costs

- AeroTec takes up to 75% less space, making it less prone to accidental collisions than ordinary truck fans that have their entire fan assembly positioned in the door opening.
- AeroTec's breakaway elbow design eliminates costly fan replacement. Unlike other truck fans that are mounted on a stiff arm support, AeroTec's elbow can be reattached in a snap if accidentally hit and knocked off, reducing costly repair or replacement.

Safer and Quieter to Operate

- AeroTec's mechanical components are mounted beyond the heavy traffic area of the door opening making it safer and quieter to operate, thus reducing noise levels and ensuring that moving parts are out of harms way.

AeroTec
ARS
with
**50% Higher
Velocity**

Compared to ordinary truck fans AeroTec™ creates a high-velocity column of air that circulates in and out of the trailer faster, creating a more comfortable work environment.
