Series 485 LED Versa Light

Innovative 320°
swivel head

The LED Versa Light 485®
provides a new twist to dock
lighting while maintaining the
same quality and sustainability
as the Versa Light 450® model.

Easy on the eyes. Engineered to maintain a quality light output of 3000k. No more complaints from workers about harsh light.

Improved flexibility of the LED Versa Light 485®. The LED Versa Light 485® effectively illuminates the ENTIRE INSIDE of an 8' X 53' trailer, while other dock lights features a 53' narrow beam of light with spotlight quality. The Versa Light 485 has an innovative 320° swivel head which allows for modifications to the light positioning with a simple turn of the light head.

Longer Life and More Power. Our fan-cooled design allows us to provide a light with superior output and 2200 lumen's of light as well as longer life LED's of 100,000 hours and more importantly, we have eliminated the harsh glare typical of other LED docklights.

Suitable for food grade applications.
